

BERA TERRACE SYSTEMS

Pedestals & Decking Sub-base

PEDESTALS & DECKING SUB-BASE

BERA introducing the State-of-the-Art and easy to install ranges of pedestals including a comprehensive subbase system, made of durable aluminium, creating the rot-free, bend-free, twist-free and weather resistant terrace.

This European terrace subbase system allows the professional contractor to create the highest quality of decking and terraces and reduce cost since the system reduces the amount of pedestals required. The aluminium system is fast and easy to install. It has virtually no screw connections and includes the option for creation of steps and ramps.

BERA Terrace Systems are suitable for gardens, around swimming pools and on roofs. Designed and manufactured by professionals, for professionals.

BERA height adjustable pedestals for decking and (ceramic) tiles are made of the highest quality of polypropylene and are fully recyclable. Range from 11mm only upto 470mm. All pedestals are manufactured in accordance with European regulations for roof application with large basis to carry the load. Optionally available are slope correctors, compensation disc and noise impact protection pads.

BERA Aluminium subbase systems are available for low height (system A) and high duty applications. A comprehensive assortment of profiles, crossbars, connectors (for straight or angled position) is provided for.

Steps and ramps was never easier and faster. The system allows you to eliminate all traditional work that had to be done in the past. The BERA subbases system is ready for all your steps and ramps!

Please contact your nearest dealer of BERA for detailed information on how we can assist you to install the best terrace you have ever seen before. Within a relative short time, you will exceed the customer's expectations.
